NUMEROUS MILK PRICE INCREASES IN JULY

Increased prices are in effect in a
number of fluid milk markets this month (July),
reflecting the generally firm dairy markets due
to reduced production and lighter supplies. The
largest increase reported is a 1¢ per quart
advance of prices to producers for Class I milk
and retail prices also at Louisville, Ky. In
the following cities retail prices are also 1¢
per quart higher, and Class I milk has increased
as indicated: Cleveland, O., 28¢ per cwt; Knox-
ville, Tenn., 25¢ per cwt; Nashville, Tenn., 40¢
per cwt; Canton, O., 30¢ per cwt; and Klamath
Falls, Ore., 17¢ per cwt. At Lexington, Ky.,
retail prices are 1 to 2¢ per quart higher on

home deliveries, and 1¢ higher at stores, with a
Class I milk increase of 25¢ per cwt. Cities
where Class I milk only has increased include:
St. Louis, Mo., 20¢ per cwt; Seattle, Wash., 14¢
per cwt; and Evansville, Ind., 7¢ per cwt. At
Kalamazoo, Mich., the license price of \$2.00
per cwt. for 3.5 percent milk is reported as
applying generally to the market instead of the
range of \$1.85 to \$2.00 reported last month.
Kansas City, Kans. reports indicate slightly
higher prices to producers this month. At
several additional markets, July prices are as
yet not definitely established, pending
negotiations.

AUGUST 1936

AUGUST MILK PRICES ADVANCE IN MANY CITIES

August milk prices are higher than last month in more than fifty cities scattered throughout the United States, according to reports received by the U.S. Bureau of Agricultural Economics. Two reductions only of producer prices are reported, one being at Boston where a combination of conditions, including a court decision unfavorable to the Federal license program has caused an unsettled situation. Retail prices are also reduced at Boston. The other reduction is reported from Knoxville, Tenn. Overshadowing these reductions, however, are the wide-spread advances, in most cases applying both to producer and consumer prices. The month's changes are indicated in the accompanying summary (see Table VII), which, it will be noted, include increases at some of the larger markets, notably Pittsburgh, Chicago, Indianapolis, Cleveland, Cincinnati, Columbus, Milwaukee, Minneapolis, St. Paul, Des Moines, Kansas City, St. Louis, Omaha, Louisville, New Orleans, Denver, Salt Lake City, Los Angeles, San Diego and Seattle. It will be noted also, that in a number of cities, the prices which prevail this month actually became effective during the last part of July.

The principal cause underlying this month's advances, is apparently the very severe drought which has either struck the leading dairy sections directly, or which is indirectly affecting or giving promise of affecting production through feed shortages and higher feed costs. Butter markets are much higher this summer than last, and prices are almost as high as in 1930. Current wholesale prices of butter are fully 11 cents per pound above a year ago. Cheese prices are 4 cents higher than last year, and have been higher than in 1930 for six weeks. Butter production was sharply curtailed in June and indications are that July will also be much lower than in 1935. These price changes on manufactured dairy products support fluid milk prices, because in many cases they form the basis of returns for milk utilized in surplus classifications.

ADDITIONAL CITIES INCREASE MILK PRICES IN OCTOBER

Continued firmness of fluid milk markets
is indicated by October price changes reported
to the Bureau of Agricultural Economics.
Increases are effective in a number of cities
scattered throughout the country, with the
majority of these cities in the East and South.
Advances at Providence, Philadelphia, and cities
in New York State and Virginia, are the result

of State Milk Control Board orders. The October
Class I price at Providence of \$3.65 per cwt.
is 45¢ above September, and retail prices are 1¢
per quart higher. The Philadelphia increase,
effective October 11, makes Class I milk now
\$2.88, an increase of 38¢, and in that market,
retail prices are also 1¢ per quart higher. In
several of the New York cities, Class I milk

NOVEMBER MILK PRICE CHANGES MOSTLY UPWARD - SEVERAL MARKETS LOWER

November reports received by the Bureau
of Agricultural Economics from milk dealers and
other sources of information in cities through-
out the United States, show fewer price changes
than for several months. Included in these
changes are several reductions, which is in
sharp contrast to the situation of previous
months during which the trend of prices was
markedly upward. November increases include
Washington, D.C., where both Class I and retail

prices are 1 cent per quart higher; Reading, Pa.,
with a 37 cents per cwt. advance on Class I milk
and a 1 cent per quart retail price advance;
Richmond, Va., with increases of 25 cents per
cwt. and 1 cent per quart on Class I and retail
prices, respectively; and Portland, Oregon
where the increases were 29 cents per cwt. on
Class I milk, and 1 cent per quart to retail
trade, these changes having become effective
November 9. At Jacksonville, Fla., Class I milk

(CONTINUED FROM PAGE THREE)

only increased 16 cents per cwt. this month, and at New Orleans retail prices only are up 1 cent per quart. Houston, Texas advanced 20 cents on Class I milk and 1¢ retail. Class I increases only are effective at additional cities as follows: Knoxville, Tenn., 20 cents per cwt; Wausau, Wis., 28 cents; Pueblo, Colo., 17 cents; Champaign, Ill., 7 cents, and Seattle, Wash., 3 cents per cwt. Increases of 52 cents per cwt. and 1 cent per quart will become effective November 16 at Baltimore on Class I and retail milk, respectively.

Price reductions in November are reported from Topeka, Kansas, where Class I milk was dropped 35 cents per cwt. on October 16, at which time a retail drop of 1 cent per quart

also occurred. This places prices at Topeka back at what they were in August. With this reduction, however, the Class I price remains above the minimum set forth in the Federal Marketing order which is in effect at Topeka. At Cedar Rapids, Iowa, Class I reductions of from 32 to 44 cents per cwt. are reported, with a 2 cent per quart retail price decline. In the same general territory, a Class I reduction of 35 cents has occurred at Lincoln, Nebraska, but retail prices remain unchanged. A drop is also reported effective at San Diego, Calif., amounting to 11 cents per cwt. on Class I milk only.
